RETRACTION

Retraction: A Lightweight Multimodal Deep Fusion Network for Face Antis Poofing with Cross-Axial Attention and Deep Reinforcement Learning Technique

Computers, Materials & Continua Editorial Office

Published: 08 May 2026

The published article titled “A Lightweight Multimodal Deep Fusion Network for Face Antis Poofing with Cross-Axial Attention and Deep Reinforcement Learning Technique” has been retracted from Computers, Materials & Continua, Vol. 85, No. 3, 2025, pp. 5671–5702.

DOI: [10.32604/cmc.2025.070422](https://doi.org/10.32604/cmc.2025.070422)

URL: <https://www.techscience.com/cmc/v85n3/64202>

Following an investigation, the article was found to contain significant overlap with previously published material, which violates the journal’s publication ethics policies and the guidelines of the Committee on Publication Ethics (COPE).

This retraction was approved by the Editor-in-Chief of the journal Computers, Materials & Continua. The authors were informed of the retraction decision; however, they have not provided any response regarding the retraction.
